

Kleidion Vault

Buyer Proof Summary

Public-safe product proof pack generated from uploaded Cybstyx Phylaxis master guide and package inspection data. This is source-based buyer collateral, not a live-customer runtime certification.

Secrets, keys, certificates, OTP seeds, adapter secrets, and approval-bound vault operations.

Category	Native Security Vault
Responsibility	Protect sensitive operational secrets and certificate material with approval, rotation, audit, and recovery controls.
Standalone boundary	No product should hard-fail if Kleidion is offline unless that workflow explicitly needs live secret retrieval.
Authentication	Local RBAC with MFA; optional Eidon SSO; signed service account access for controlled secret retrieval.
Linked applications	Optional SecOwl adapter, Nomion, Eidon, and product secret consumers such as Pteron, Orama, Phylax, Keraunix, and Chronyx.

Source Evidence Snapshot

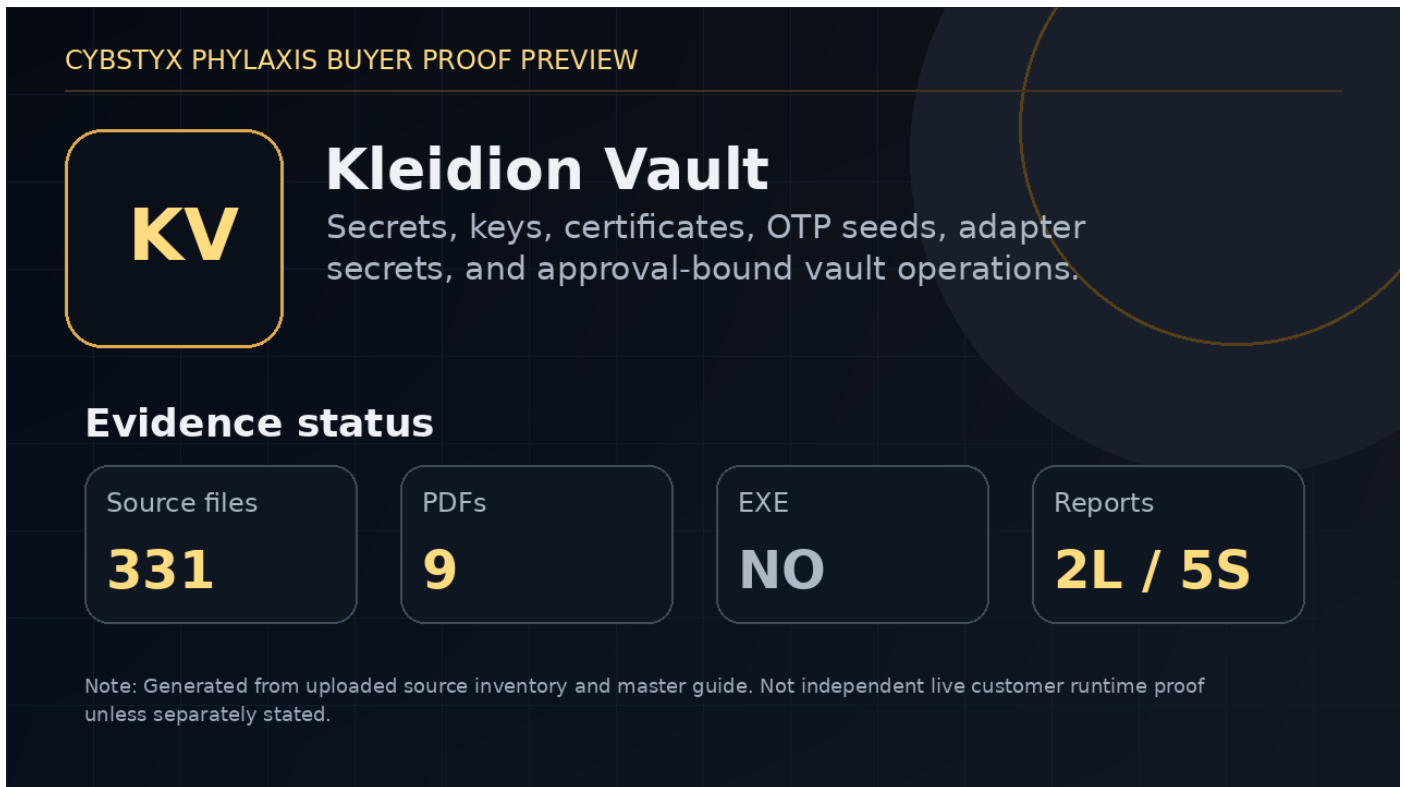

Source files inspected	331
PDF documents in package	9
Executable evidence found	NO / not found in root scan
Live/self-test reports referenced	2 live / 5 self-test
Language profile	Python, JavaScript, Go, Java, PowerShell
Database/configuration modes	local database/configuration

Core modules

<ul style="list-style-type: none">• Secret and certificate vault• Key lifecycle and rotation• Approval matrix and break-glass• Access audit and sealed exports• Backup and restore controls

Visual Proof Preview

The image below is a generated buyer proof preview based on the uploaded source inventory and master guide. Use the separate contact sheet and MP4 preview for visual sales review.

Recommended buyer usage: share this pack as a source-backed capability and readiness brief. For production procurement, pair it with a live demo, customer environment scope, licence term, deployment checklist, and signed acceptance test.
