

Noetron AI Guard

Buyer Proof Summary

Public-safe product proof pack generated from uploaded Cybstyx Phylaxis master guide and package inspection data. This is source-based buyer collateral, not a live-customer runtime certification.

AI governance, prompt and policy guardrails, human approval, knowledge snapshot, and AI audit evidence.

Category	AI Governance / Safety / Approval Control
Responsibility	Govern AI workflows with prompt defense, policy boundaries, approvals, red-team testing, and rollback snapshots.
Standalone boundary	Noetron must not learn or transmit client data externally unless explicitly configured by client policy.
Authentication	Local RBAC with MFA; optional Eidon SSO; service authentication for guarded AI workflows.
Linked applications	Optional SecOwl adapter, Kleidion secrets, Tekmerion evidence, Chronyx events, Keraunix approvals, Eidon, and Nomion.

Source Evidence Snapshot

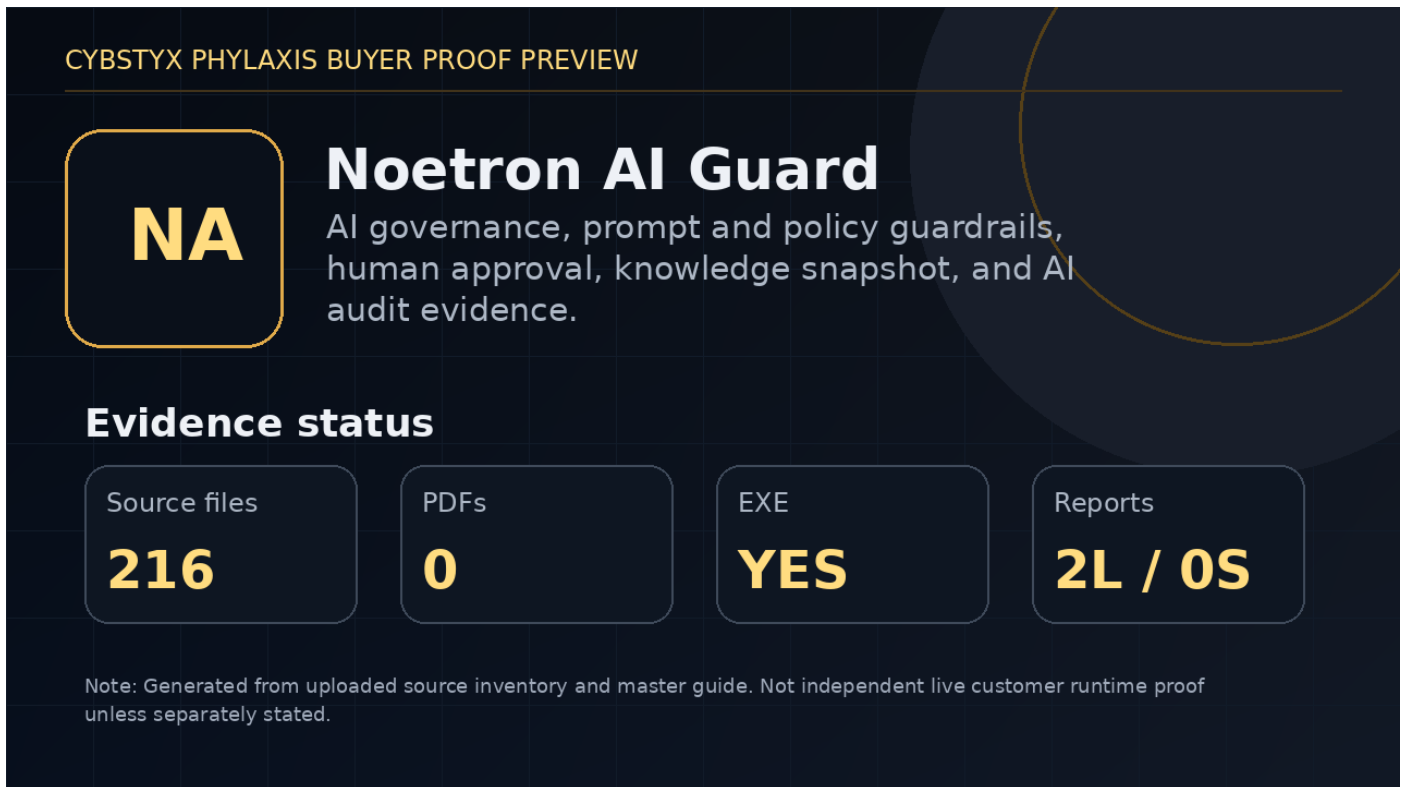

Source files inspected	216
PDF documents in package	0
Executable evidence found	YES
Live/self-test reports referenced	2 live / 0 self-test
Language profile	Python, JavaScript, Go, Java, PowerShell
Database/configuration modes	sqlite-native, postgresql-schema-ready

Core modules

- AI command center
- Prompt defense and secret leakage shield
- Forbidden learning guard
- Approval desk and policy studio
- Red-team lab, rollback snapshots, and audit trail

Visual Proof Preview

The image below is a generated buyer proof preview based on the uploaded source inventory and master guide. Use the separate contact sheet and MP4 preview for visual sales review.

Recommended buyer usage: share this pack as a source-backed capability and readiness brief. For production procurement, pair it with a live demo, customer environment scope, licence term, deployment checklist, and signed acceptance test.
