

# Nomion Licence Authority

## Buyer Proof Summary

Public-safe product proof pack generated from uploaded Cybstyx Phylaxis master guide and package inspection data. This is source-based buyer collateral, not a live-customer runtime certification.

Licence generation, entitlement, activation, offline import/export, renewal, and vendor-client licence governance.

Category	Native Licence / Vendor Lifecycle Authority
Responsibility	Issue and manage signed product entitlements, activation records, renewals, revocation, and offline activation workflows.
Standalone boundary	If Nomion is offline, products continue using local signed licence cache until expiry or grace policy.
Authentication	Strict admin RBAC with MFA; service authentication for licence validation or signature workflows.
Linked applications	Licence backbone for SecOwl and all Phylaxis products; optional SecOwl adapter for entitlement visibility; Kleidion key custody recommended.

### Source Evidence Snapshot

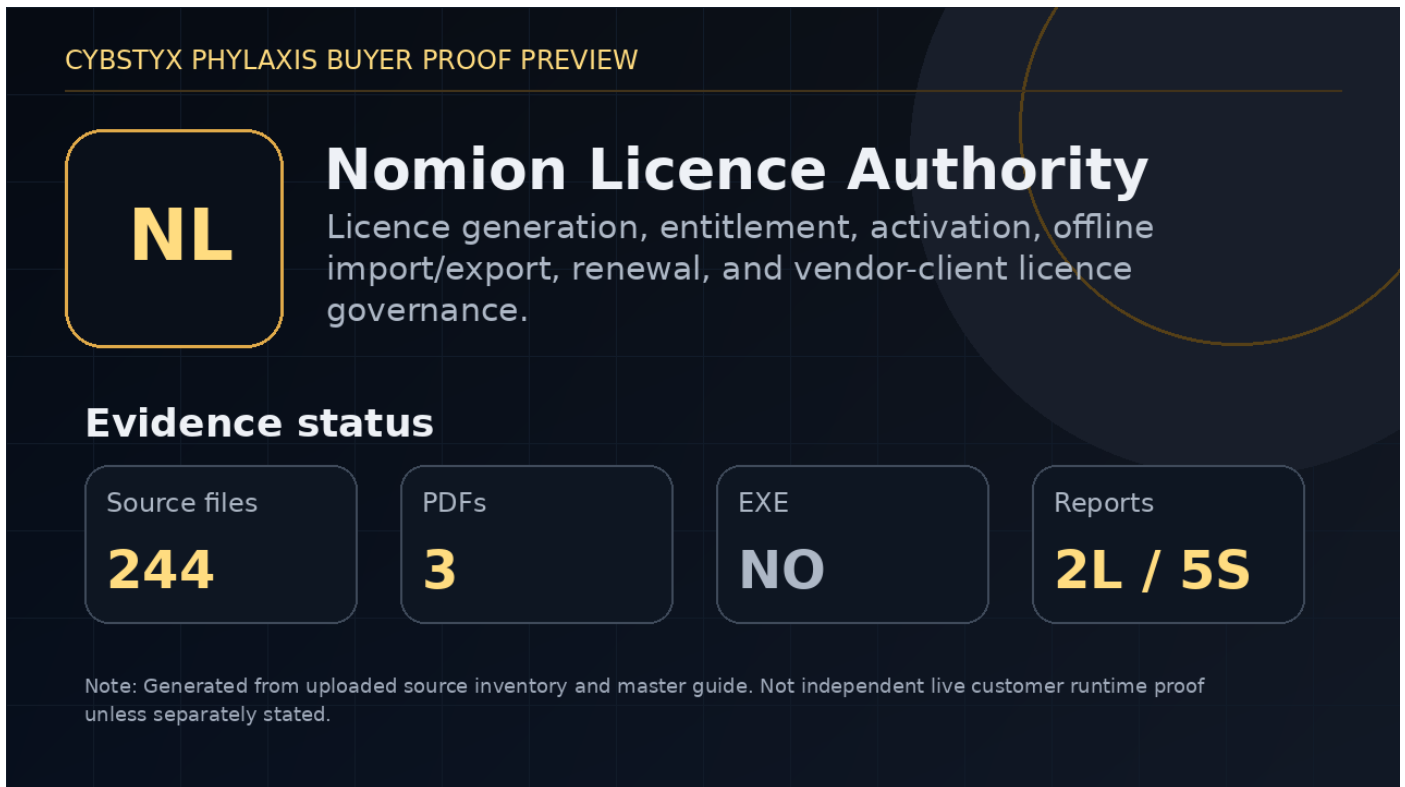

Source files inspected	244
PDF documents in package	3
Executable evidence found	NO / not found in root scan
Live/self-test reports referenced	2 live / 5 self-test
Language profile	Python, JavaScript, Go, Java, PowerShell
Database/configuration modes	sqlite-native-production, postgresql-schema-and-migration-ready-runtime-requires-psycopg-client

### Core modules

<ul style="list-style-type: none"><li>Licence issuer</li><li>Product entitlement registry</li><li>Client and site records</li><li>Signed licence and activation history</li><li>Offline activation kit, renewal, revocation, audit, and support windows</li></ul>

## Visual Proof Preview

The image below is a generated buyer proof preview based on the uploaded source inventory and master guide. Use the separate contact sheet and MP4 preview for visual sales review.

Recommended buyer usage: share this pack as a source-backed capability and readiness brief. For production procurement, pair it with a live demo, customer environment scope, licence term, deployment checklist, and signed acceptance test.
