

SecOwl Real Running App Proof Summary

This buyer-safe proof pack contains selected visual evidence from the uploaded two-minute Chromium screen recording of a running SecOwl application session.

Included public review assets:

- Two-minute running application screen recording
- Five timestamped proof frames from the recording
- Screenshot contact sheet for quick visual review
- SecOwl brand visual references supplied with the proof pack

Security cleanup:

- Operational logs, API proof files, internal run traces, package files, and implementation details are not included in this buyer-facing website package or proof download.

Scope note:

These assets support buyer evaluation and technical walkthrough preparation. Customer-specific deployment readiness, endpoint behaviour, connectors, policies, and controls should be verified during client-side implementation planning.
