

Sideron Integrity Guard

Buyer Proof Summary

Public-safe product proof pack generated from uploaded Cybstyx Phylaxis master guide and package inspection data. This is source-based buyer collateral, not a live-customer runtime certification.

Patch integrity, endpoint fleet update verification, rollback, compliance, and maintenance evidence.

Category	Patch Integrity / Endpoint Fleet / Rollback / Evidence / Compliance
Responsibility	Verify packages and fleet updates, detect drift, plan patch rings, and preserve maintenance evidence.
Standalone boundary	Patch integrity functions remain local; SecOwl central command is optional and approval-gated.
Authentication	Local RBAC with MFA; optional Eidon SSO; endpoint or service authentication.
Linked applications	Optional SecOwl adapter, Phylax endpoint, Tekmerion evidence, Chronyx timeline, Keraunix response, Nomion, and Eidon.

Source Evidence Snapshot

Source files inspected	223
PDF documents in package	3
Executable evidence found	YES
Live/self-test reports referenced	2 live / 0 self-test
Language profile	Python, JavaScript, Go, Java, PowerShell
Database/configuration modes	sqlite-production-default, postgresql-deployment-schema, runtime-backup-restore-safe

Core modules

<ul style="list-style-type: none">Signed update verificationDigest checksRollback snapshotsOffline update manifestFleet patch agent, staged rings, maintenance windows, RCA, and compliance reports

Visual Proof Preview

The image below is a generated buyer proof preview based on the uploaded source inventory and master guide. Use the separate contact sheet and MP4 preview for visual sales review.

Recommended buyer usage: share this pack as a source-backed capability and readiness brief. For production procurement, pair it with a live demo, customer environment scope, licence term, deployment checklist, and signed acceptance test.
